

Petros Gaganis, Dr.

SHORT CURRICULUM VITAE

Current occupation:

Assistant Professor
University of the Aegean, Department of Environment
University Hill, Xenia Building
81 100 Mytilene, Greece

Contact Information:

TEL: +30 - 22510 - 36293 (Office)
FAX: +30 - 22510 - 36209
E-MAIL: gaganis@aegean.gr
WEB PAGE: http://www.env.aegean.gr/site/EN/CV/DEP/Gaganis_en.html

Educational Background

Ph.D. in Stochastic Hydrogeology: January 1997 – September 2000
University of British Columbia, Department of Earth and Ocean Sciences, Vancouver, British Columbia, Canada

M.Sc. in Contaminant Hydrogeology: September 1995 – December 1996
University of British Columbia, Department of Earth and Ocean Sciences, Vancouver, British Columbia, Canada

B.Sc. in Geology: September 1981 – December 1985
Aristotle University of Thessaloniki, Department of Geological Sciences, Thessaloniki, Greece.

Research Experience

Assistant Professor, Department of Environment, University of the Aegean, Mytilene, Greece, October 2004 – today.

Subject: Management of water resources at a watershed scale. Integration of multidisciplinary data in risk-cost-benefit analyses and development of decision models to identify optimal management alternatives.

Research Fellow, FORTH/ICE-HT, HELLAS, (Foundation of Research and Technology - Institute of Chemical Engineering and High Temperature Chemical Processes), Patras, Greece, February 2001 – 2004.

Subject: Numerical modeling and identification of physical/chemical processes and critical parameters that affect the transport of volatile organic contaminants (VOCs) in the unsaturated zone and risk assessment. Scenario specific modelling of transport of organic mixtures in the vadose zone and application to lab and field experiments. Determination of the characteristics of contaminant transfer and quantification of pollutant transport (by advection, diffusion and dispersion) across the capillary fringe. Development of a cost-effective methodology to modeling transport of multicomponent VOC mixtures in the vadose zone.

Research Assistant, University of British Columbia, Department of Earth and Ocean Sciences, Vancouver, British Columbia, Canada, 1996-2000

Subject: Stochastic modeling of flow and transport of radionuclides in groundwater, risk-cost-benefit analyses. Methodology development for quantifying the effect of errors in the structure of a model (model error) on groundwater model predictions. Methodology development to account for model error in parameter estimation (inverse method). Development of a decision model, which takes into account both parameter and model uncertainty, for evaluating the necessity of protective measures for the Pripyat Town well field located near the Chernobyl Nuclear Plant.

Research Associate, Golder Associates, Vancouver, British Columbia, Canada, 1999

Subject: Post-mining environmental impact assessment through numerical modeling (Diavik Mines).

Participation in Relevant International and National Research Projects

- 1997-2000 - Project title: “Quantification of the Effect of Model Error on Groundwater Model Predictions and Risk assessment”, University of British Columbia (funded by the Natural Science and Engineering Research Council of Canada (NSERC)).
- 2000-2003 - Project title: “Groundwater Risk Assessment at Contaminated Sites (GRACOS)”, EVK1-1999-00148, 5th European Community Framework Programme
Total Budget : 2.550.000 EURO
Partners: (i) Eberhard-Karls University Tübingen (D), (ii) Netherlands Energy Research Foundation, Netherlands (NL), (iii) Technical University of Denmark (DK), (iv) Ecole Polytechnique Federale de Lausanne (CH), (v) ICE/HT – FORTH, HELLAS (GR), (vi) Foundation Labein (E), and (vii) Foundation Gaiker (E)
- 2002-2003 - Project title: “Droplet-substrate interaction for micro patterned film fabrication”, ICE/HT – FORTH, HELLAS (funded by SEIKO EPSON CORPORATION)
Total Budget : 81.000 EURO
- 2005- 2009 - Project title: “Assessment of the effect of permanent and temporary sources of contamination on water resources quality in N.W. Achaia using information and communication technologies”, ICE/HT – FORTH, HELLAS (funded by Region of western Greece, Prefecture of Achaia).
Total Budget : 100.000 EURO
- 2009-20011- Project Title: “Long term Runoff Monitoring of the main rivers of the proposed dam sites Tsiknias & polichnitos, Lesvos” (funded by Region of Eastern Aegean, Prefecture of Lesvos).
Total Budget : 110.000 EURO
- 2010-20013- Project Title: “ Surface water and Groundwater Nutrient Dynamics in a watershed of East Mediteranean” (funded by EPEAEK “Iraklitos II”)
Total Budget : 45.000 EURO
- 2012-20015- Project Title: “ Advances in Geostatistics for Environmental Characterization and Natural Resources Management” (funded by “ARISTEIA” Action of the “OPERATIONAL PROGRAMME EDUCATION AND LIFELONG LEARNING” and is co-funded by the European Social Fund (ESF) and National Resources)
Total Budget : 250.000 EURO

Scientific Publications

Ph.D. Thesis

Gaganis, P., 2000. On the Quantification of the Effect of Model Error on Groundwater Model Predictions and Risk assessments. *Ph.D. Thesis*, University of British Columbia, Vancouver BC, Canada.

Academic Distinctions/Awards

- *Performance Award/ Scholarship*, Aristotle University of Thessaloniki, 1982-1983
- *Competitive Scholarship* (three years), National Scholarship Foundation of Greece, 1995 - 1998

- *Research Assistantship*, Natural Science and Engineering Research Council of Canada, 1998 - 2000
- *MacKay Scholarship/ Award*, University of British Columbia, 1999-2000
- *Invited speaker*: Gaganis, P. Methods for the Quantification of the Effect of Model Error on Model Predictions and Risk assessments, ICE/HT – FORTH, HELLAS, (Foundation of Research and Technology - Institute of Chemical Engineering and High Temperature Chemical Processes), 2000.
- *Invited speaker*: Gaganis, P. and L. Smith. Quantification of the Effect of Model Error on Groundwater Model Predictions and Risk Assessment. AGU Fall Meeting San Francisco, California, USA, 2002.
- *Distinction*: The article “**Gaganis, P.**, and L. Smith. 2006. Evaluation of the uncertainty of groundwater model predictions associated with conceptual errors: A per-datum approach to model calibration. *Advances in Water Resources*, vol. 29, pp. 503-514” RANKED 3RD ON THE TOP 25 FOR ADVANCES IN WATER RESOURCES - JANUARY TO MARCH 2006 (http://top25.sciencedirect.com/index.php?subject_area_id=9&journal_id=03091708&cat_id=7)
- *Invited lecturer*: Gaganis, P. Techniques for model calibration/parameter estimation and model conceptual errors. NATO institute on “Uncertainties in environmental modelling and consequences for decision making”, Sept 30 to Oct 11, 2007, Vrsar (Croatia)
- *Distinction*: The article “**Gaganis, P.**, and L. Smith. 2008. Accounting for Model Error in Risk Assessments: Alternatives to Adopting a Bias Towards Conservative Risk Estimates in Decision Models. *Advances in Water Resources*, Vol. 31, no. 8, pp. 1074-1086.” RANKED 23RD ON THE TOP 25 FOR ADVANCES IN WATER RESOURCES - JULY TO SEPTEMBER 2008 (<http://top25.sciencedirect.com/subject/earth-and-planetary-sciences/9/journal/advances-in-water-resources/03091708/archive/19/>)
- *Distinction*: The article “Efficient Simulation of (Log)Normal Random Fields for Hydrogeological Applications” by Phaedon Kyriakidis and Petros Gaganis. *Mathematical Geosciences*. 45 (6):53 1- 556 received the **2013 Best Paper Award** for Mathematical Geosciences.

Professional Affiliations

- Geotechnical Chamber of Greece, since 1986
- Greek Association of geologists, since 1986
- American Geophysical Union, since 1998
- Greek Committee for Water Resources Management (ΕΕΔΥΠ), since 2006

Other Professional Activities

- **Reviewer** for the international journal “Environmental Science and Technology”

Research Interests

Numerical modeling of processes involved in (i) groundwater flow in homogeneous and heterogeneous soils, and (ii) transport and possible natural attenuation of contaminants in the vadose and saturated zones

Optimization algorithms and methodologies in mathematical modeling of hydrologic systems, methods for quantifying the reliability of flow and transport model predictions

Stochastic methods, risk analyses regarding (i) groundwater contamination and (ii) water management problems

Integration of multidisciplinary data, risk-cost-benefit analyses and development of decision models to identify optimal water management alternatives
